

## HG&E Dig Safe® Activity

State laws require utility companies to mark underground utilities in areas where construction projects are taking place. This activity report is meant to provide customers with a list of HG&E's planned projects that require spray painting and/or flagging the underground utilities in your area.

**Please note: HG&E will do our very best to list all of our related projects. Emergency situations will not be listed on this document.**

### Dig Safe® Color Codes

<b>RED</b>	ELECTRIC
